

NEPAL AVIATION PROGRAM | STUDENT GUIDE

500 Hrs Line Training & Junior First Officer Development Program

A performance-gated pathway for A320-rated pilots seeking supervised airline experience, structured line development and professional career progression.

500

Target line-training hours

200+

Minimum flight hours*

8 FFS

Simulator proficiency hours

USD 82.3K

Indicative net program fee**

Executive Overview

From A320 Type Rating to supervised airline operating experience

The proposed program is designed for qualified pilots who already hold an Airbus A320 rating and require a disciplined transition into airline line operations. It combines documentary screening, interview, enhanced simulator training, proficiency verification, ground preparation, cruise-pilot exposure, full-flight development, a formal line check and continued flying toward a 500 Hrs Junior First Officer target.

A320

Existing aircraft rating required

8 Hrs

Enhanced FFS proficiency phase

80+

Initial supervised sectors

500 Hrs

Line-development target

Program objective

Build airline-operating competence through a transparent and auditable progression framework, with each stage conditional on technical proficiency, medical fitness, regulator requirements and individual performance.

Strategic value for Nepal

Creates a structured pathway for A320-rated Nepali pilots who need supervised operational experience to strengthen airline readiness and improve long-term competitiveness in Nepal and international markets.

Performance-gated

Candidates advance only after satisfying documentary, interview, simulator and operational checks.

Milestone-funded

Commercial commitments are linked to defined program stages and deliverables.

Governance-led

Program participation, hours and employment outcomes remain subject to executed agreements, operational capacity and applicable approvals.

“अनुभवले दक्षता बनाउँछ, र दक्षताले अवसरको ढोका खोल्छ।”

“Experience builds competence, and competence opens the door to opportunity.”

*The source flow permits a minimum 200 flight hours with Frozen ATPL, or 500 total flight hours. **Indicative net fee excludes the refundable USD 5,000 proficiency deposit and may exclude travel, visa, insurance, taxes and other third-party charges.

Step 1 - Selection & Qualification

Clear entry requirements and independent decision gates

The candidate journey begins with a document-based eligibility review followed by an interview coordinated with approved training organisations and airline representatives. Candidates failing any mandatory gate do not progress further.

Selection principle: Candidate evaluation should be documented and auditable. No participation, hour-completion or employment outcome should be represented as guaranteed.

Pre-Line Readiness Gate

Eight hours of focused FFS training before operational placement

PROFICIENCY DEPOSIT

USD 7,000 before simulator training

The source flow indicates that USD 5,000 is refundable and USD 2,000 is non-refundable. The refund trigger, timing and deduction conditions must be clearly stated in the executed candidate agreement.

Program gate:

Only candidates who pass the enhanced simulator training and proficiency check proceed to sign the line-training agreement.

Technical Handling

01

Aircraft control, automation and SOP adherence

CRM

02

Communication, workload sharing and crew coordination

Abnormal Events

03

Scenario-based handling and decision-making

Operational Discipline

04

Checklist use, threat management and procedural consistency

Final Check

05

Documented proficiency result and progression decision

Candidate protection

Issue a written assessment report, clearly identify pass/fail standards and provide a transparent refund process for the refundable portion of the proficiency deposit.

Program quality assurance

Use standardised check forms, qualified instructors and examiners, and a retained audit trail to protect program credibility and reduce selection disputes.

Step 2 - Operational Development

Five structured phases from ground school to Junior First Officer

After successful screening, simulator proficiency and agreement execution, the candidate enters a staged airline-development pathway. Progression is contingent on operational availability, regulatory approvals, training performance and the airline's independent standards.

Indicative Program Economics

Transparent milestone payments and scalable cohort value

The source flow indicates a total cash collection of **USD 87,300** per candidate, including a **USD 5,000** refundable proficiency deposit. The indicative non-refundable / net program fee is therefore **USD 82,300** subject to the final commercial agreement.

Milestone	Timing	Cash Paid	Refundable	Indicative Net Fee
Registration	At application	USD 300	Nil	USD 300
Simulator enhancement & proficiency	Before FFS phase	USD 7,000	USD 5,000	USD 2,000
Ground-school mobilisation	Before Ground School	USD 45,000	Subject to contract	USD 45,000
Full-flight mobilisation	Before Full Flight	USD 35,000	Subject to contract	USD 35,000
Total	-	USD 87,300	USD 5,000	USD 82,300

Illustrative net cohort program value

Required commercial controls

- Milestone-based invoicing
- Segregated refundable deposits
- Written inclusions and exclusions
- Refund, withdrawal and failure terms
- Provider payout and tax schedule
- Candidate risk acknowledgement

Important interpretation

Illustrative cohort values are gross program-fee calculations only. They are not profit forecasts and exclude airline, training, administration, refund and third-party delivery costs.

Operating Model

One program, clear responsibilities and auditable delivery

The Nepal pathway should combine local stakeholder trust, international airline-training capacity and disciplined program governance under a single accountable framework.

Student Support in Nepal

- Candidate outreach and counselling
- Document collection support
- Career seminars and parent briefings
- Local stakeholder engagement
- Candidate communication

Air Prime Asia

- Program architecture and standards
- Candidate eligibility framework
- International coordination
- Quality assurance and reporting
- Risk, grievance and program governance

Training Organisations & Airlines

- Simulator enhancement and check
- Ground and operational training
- Instructor / examiner allocation
- Line-training opportunities
- Independent progression decisions

Non-negotiable safeguards

- No guaranteed employment claims
- Medical, licence and rating verification
- Written pass/fail and progression criteria
- Transparent fees and refund terms
- Candidate data protection and audit trail
- Grievance redressal and incident escalation

Student progress dashboard

- Verified candidate pipeline
- Interview and proficiency conversion
- Training-start ratio
- Sectors and hours completed
- Line-check performance
- Candidate satisfaction and grievance closure
- Program service-level compliance

Program limitation: Simulator training, line training, hours, checks and airline employment are subject to the applicable regulator, airline and training-provider capacity, aircraft availability, medical eligibility, immigration approvals, executed contracts and individual performance. No employment or hour-completion outcome is guaranteed.

AT-A-GLANCE PROGRAM FLOW

From Candidate Screening to 500 Hrs of Junior First Officer Development

A clear one-page summary of eligibility, simulator proficiency, operational phases and payment milestones.

STEP 1

Selection & Proficiency Gate

Registration, eligibility review, interview and 8 Hrs Full Flight Simulator proficiency validation.

STEP 2

500 Hrs Line Training & Junior First Officer Development Program

Five performance-gated phases with defined outputs and milestone-linked payments.

100 Hrs

Cruise pilot stage

40+

Cruise sectors

100 Hrs

Full-flight stage

500 Hrs

Program target

All stages, payments, hours and progression outcomes are subject to regulatory approvals, airline and training capacity, executed agreements, medical eligibility and individual performance.

NEPAL AVIATION PROGRAM

Building airline-ready professionals through disciplined line experience

Air Prime Asia proposes a transparent, performance-led pathway that connects qualified A320-rated pilots with enhanced simulator validation, structured line training and a 500 Hrs Junior First Officer development program.

“नेपाली पाइलट प्रतिभालाई विश्वस्तरीय उड्डयन अनुभवसँग जोड्दै।”

“Connecting Nepal's pilot talent with world-class aviation experience.”

PROGRAM ARCHITECTURE

Selection, proficiency and line-development pathway

QUALITY GOVERNANCE

Documented standards, controls and reporting

LONG-TERM VALUE

Airline readiness and professional capability development
